

In lore, it is said that the leprechaun hides his pot of gold in a secret place - at the end of a rainbow. However, this place is impossible to reach, because the end of the rainbow is an optical illusion that depends on the location of the viewer - it's not a fixed place. If you try to approach the end of a rainbow, it will just move further away. Have fun coloring in this leprechaun sliding down a rainbow to his pot o' gold!
